Eligible Period

An Eligible Period is a calendar quarter commencing on 1st January, 1st April, 1st July and the 1st October within each 12 month period. This is outlined in the Rebate Summary on the “Programme” website.

Eligible Products

Eligible Products are all Lenovo Data Center products (including hardware, software, and services) and are described on the “Programme” website.

Target Notification

Early in the calendar quarter (“Eligible Period”), Lenovo will publish sales revenue targets via the “Programme” website. Targets will be visible for each of the Eligible Periods.

Rebates

Eligible Resellers can select their Lenovo sale revenue target from 2 target band options at the time of enrollment.

1. Minimum sales target of 5k with overachievement up to 15k capped, listed in local currency
2. Minimum target with 15k with overachievement up to 25k capped, listed in local currency

Target revenue bands logic is for example 5-15k means as soon as 5k is hit, there is a rebate guaranteed (rebate from 5k band) but they can increase sales and reach a maximum of 15k will guarantee them the top rebate payment from 5-15k band.

The sales target set is for the entire quarter and targets are not changeable within period.

Eligible Resellers that accept terms and target in month 1 and of the quarterly period will be able to over achieve and earn a higher rebate. No Resellers can join in month 3 of any given period. If the Eligible Reseller fails to meet the target the rebate will not be paid.

Payment of Cash rebate

Resellers have 30 days from notification of rebate from Lenovo to submit their invoice, rebate invoices outside of this period will not be accepted.

(i) SalesThrough Lenovo Data Center Group products

Using a process called "dollarization", SalesThrough revenue measurements calculated for the purposes of target and attainment calculations are based on net SalesIn revenue billed by Lenovo to distributor plus a notional uplift to reflect estimated distributor margin. For transactions reported by an authorised distributor as sold-out with a Special Bid, the Special Bid price will be used for dollarization. For transactions not reported as sold-out with a Special Bid by an authorised distributor, a calculation is made based on the distributor's average purchase price of the related part numbers from Lenovo plus a notional uplift. If no average purchase price is available for a distributor, then the standard Lenovo distributor channel price plus a notional uplift is used. The amount calculated by the dollarization process will be reduced by any promotion or specific sell-out funding and transactional credits that will be paid by Lenovo. Any SalesThrough targets set by Lenovo for Data Center Group incentive programmes are based on dollarized revenue.
